

avishkaar

IOT

IoT Microdegree

Ages 10+

Benefits of this program

24 one-hour live online sessions with expert trainers in 3/6 months

21 class projects + 21 additional challenges to master your skills

Demo Days to present personal projects and get expert feedback

Detailed reports of creative and conceptual learning

Global Community - Innovate with others and connect with experts

Free expert counselling to help with child's progress

Avishkaar's educational experience proudly bears
the **STEM.org** trustmark

Learn using

AMS

Avishkaar Maker Studio
Block Programming Software

MakerBoard

Demo Day

Demo Day

Milestone 1

Milestone 2

Milestone 3

Animation Coder

Learn to create various types of animations using LED matrix on MakerBoard

Beginner IoT Enthusiast

Learn in detail about Internet of things and make various applications using Bluetooth and MB Play app

Beginner Electronics Enthusiast

Learn to make various circuits based projects using sensors and Bluetooth

Each Milestone will have

8 Sessions

14 Challenges

Regular Global Competitions

Milestone 1: Animation Coder

Sessions

01

Name initial letter

- LED Matrix
- Pattern Glow

02

Display Board

- Coordinates
- Custom Pattern

03

Mood Badge

- Basic of Animation
- Delay

04

Happy Birthday Tune

- Use of On-Board Buzzer

05

Sargam

- Custom Music with On-Board Buzzer

06

TV Channels

- Events
- On-Board Buttons

07

Firefly Effect

- Advanced Loops
- Animation

Demo Day

- Demonstration Skills
- Design Thinking Process

Milestone 1: Certificate

avishkaar

0001
0100

Animation Coder

This certificate has been awarded to

for completion of "Milestone 1 : Coding and Animation
Course" on _____ of
- IoT Starter Microdegree.

Tarun Arora

Founder & CEO, Avishkaar

Milestone 2: Beginner IoT Enthusiast

Sessions

01

Building a zoo

- Understanding Sprites

02

Tracing a square

- Manipulating Sprites

03

100 natural numbers on app

- Bluetooth and Application

04

Print Voice Messages

- Text to Speech
- Voice Controlled System

05

Piano

- Sliders and Piano Controls

06

Wireless snake game

- Wireless Communication between two Bluetooth enabled Device

07

Tilt Game

- Accelerometer Sensor
- Tilt detection

Demo Day

- Demonstration Skills
- Design Thinking Process

Milestone 2: Certificate

avishkaar

Beginner IoT Enthusiast

This certificate has been awarded to

for completion of "Milestone 2 : Beginner IoT Course"

on _____ of _____

- IoT Starter Microdegree.

Tamara Shetty ..

Founder & CEO, Avishkaar

Milestone 3: Beginner Electronics Enthusiast

Sessions

01

Contactless Door Opener

- IR Sensor and Application

02

Knight Rider Circuit

- Series and Parallel Circuits

03

Fading effect

- Concept of PWM

04

Basic servo movements

- Servo Motor movements

05

Rain alarm

- Rain water Sensor and application

06

Pollution Badge

- MQ Sensor and application

07

Reading Glass wiper

- Servo Motor Application

Demo Day

- Demonstration Skills
- Design Thinking Process

Milestone 3: Certificate

avishkaar

Beginner Electronics Enthusiast

This certificate has been awarded to

for completion of "Milestone 3 : Beginner Electronics
Course" on _____
of _____
- IoT Starter Microdegree.

Tarun Arora ..

Founder & CEO, Avishkaar

Stay on top of the child's progress

Parents get detailed reports including:

Projects made by students

Feedback from trainers

Badges earned

Progress on skills

Microdegree Certificate

**Curriculum designed
by alumni and
veterans from
prestigious universities
and companies**

Ace Design + Communication Skills

Let's Avishkaar

Your kids get access to our global community Let's Avishkaar with thousands of innovators from across the globe

Monthly expert webinars

Free workshops and how-to-videos

Exciting content on next-gen tech

Regular competitions win prizes upto Rs10,000/-

Avishkaar League

Prepare to participate in
Asia's Biggest Innovation
& Robotics Competition

United States

Dubai

Russia

China

Maldives

Singapore

Win prizes upto
Rs. 5 lacs
including sponsored
international competitions

Learn from Masters

Pragya
Robotics Trainer

6000+ hours

Pragya is passionate Robotics & Coding Instructor with 20+ years of experience.

Shweta
Curriculum Lead

6000+ hours

Shweta is a driven Robotics & Coding trainer with over 15+ years of experience.

Gautam
Robotics Trainer

6000+ hours

Gautam is one of our most beloved Robotics, Coding & App Dev trainers.

Amarpreet
Curriculum Lead

6000+ hours

Amarpreet is a young coding & electronics trainer full of passion and zeal.

Hear from our happy customers

Kiyansh, 10

"I made a humanoid robot to help take care of COVID patients in isolation"

Aarav, 7

"I have made a Smart Dustbin that works on my command. This will help in contactless disposal of the waste"

Adhiraj, 10

"I made an automatic screwdriver to help me and my dad with our robotic projects"

FAQs

Is this suitable for kids who have never done any coding before?

Yes. This is the perfect course for kids aged 10+ who have never done any coding before. If your kids love tech and want to make their own awesome software and video games, then they should join this course today!

Do I need to pay separately for the software and kit used in the course?

The cost of the software and kit are already included in the MRP. If you are an existing Avishkaar customer who already have our kits and just want the training, then click on the 'I already have the kit' option to see the training only cost.

What is the format of the course?

It is a live online course with 1:3 batch strength, where each week the students make one new project with a trainer on video call, and get one project as homework.

Would I receive some guidance for the demo day projects?

Avishkaar's "Demo Day" is when your child learns to apply knowledge to action.

- It is probably the most significant part of the course as the child develops skills like self-learning, confidence, crisp and precise articulation, engaging with people, and problem-solving skills while working on creating an all-new project.
- While the child is preparing to present the demo day project, they can request guidance from the mentor. The mentor would answer the child's questions and direct the child in the right direction. However, making and presenting the project is entirely the child's responsibility.

Still not convinced ?

Trust the 200,000+ young innovators & the
'Stars of Avishkaar'
who're already flying high across the globe..
